HTML tags – First Simple Page

Anything inside these < > brackets is called a tag – this tag <html> means this is the start of a web page

This is the start of the head area of the page – things inside this DO NOT print on the web page

The title of the page does not appear ON the page because it is in the head area – it shows on the browser tab though.

The body tag – start of the area of the page that DOES print on the web page.

Tags are closed using the / so </html> means this is the end of the web page – everything between these tags is part of the page

This <h1> tag is a text tag – it makes the text into a heading – h1 is biggest – you can try h1 to h5 - The end tag shows when to stop making the text a headline

This text is in a paragraph tag – it puts a space before and after the line.

This tag <a ... > is an anchor tag in this case it points to another page a hyperlink – the text shown on the page is "Next Page"

```
1   <DOCTYPE html>
2   <html>
3
4   <head>
5     <meta charset="utf-8">
6     <meta name="viewport" content="width=device-width">
7     <title>Food and Drink</title>
8     <link href="style.css" rel="stylesheet" type="text/css" />
9   </head>
10
11  <body>
12
13    <h1> My headline </h1>
14    <p> This is my first web site so it is not too great yet </p>
15    <a href="page_one.html"> Next Page </a>
16  </body>
17
18  </html>
```
