Func

Features vs Functions

Common 5 mark question!

What does it look like?

What does it do?

Functions of Elections

i.e. What are they for?

Representation - e.g. Nicky Morgan and Gay Marriage, Feb 2013 - 285 constituents against, 24 for

Participation - Turnout: 1992 77.7%, 2001 59.4%, 2010 65.1%

Education - Manifestos e.g. Conservatives and 2017 Referendum on Europe

Legitimation - Voting = consent. By voting, you accept the system we use to form govt

Accountability - e.g. Jacqui Smith, Expenses and the 'Rotten Parliament'

Choosing Govt - we elect PARLIAMENT, not GOVT

Mandate and Doctor's Mandate

Types of Electoral System

Majoritarian

50%+1

Plurality

More than the next bloke

Hybrid

Mix of two systems together

Proportional (PR)

% of votes = (roughly) % of seats gained

This is NOT NOT NOT a system!! It is a **TYPE** of system

e.g. The Premier League is a type (level) of football, but the teams all have their own names, such as the mighty Tottenham Hotspur!

Plurality System

How it works:

Place an 'X' next to your preferred candidate

Winning candidate is the one with most votes and goes to Westminster

Government is formed by the party with a MAJORITY of winning candidates

Two party system...?

Labour bias **Outcomes/Effects**

Little 3rd party impact

Single party govt

Simple - Morgan: 21, 971 (41.6%), Reed 18,227 (34.5%)
Clear outcome...mostly! Labour 179 seat majority in 1997
Strong & Stable Govt - Even Coalition e.g. Student Tuition Fees
Accountable Govt - Expenses: Maria Miller 2014 (jumped before pushed)
MP/Constit. Link - Nicky Morgan and ChAI
Clear mandate - even the Coalition! e.g. HS2

This is easily debatable...the people did not vote based on the 'Coalition Agreement'

However, we did get what we voted for, not the end of a mathematical calculation

Pros/Cons

Arguably, the Coalition DO have a majority of the national vote! 59.1% of the vote collectively

Voter Value - 1 vote does not always = 1 vote <http://www.voterpower.org.uk/>
Safe seats and electoral deserts - Henley on Thames (30,054, 56.2%, LD 13,466, 25.2%)
No majority - e.g. Nicky Morgan
Not proportional - Lab 29% = 258 seats, LD 23% = 57 Seats
Tactical voting - two party system encourages tactical voting
Wasted votes - 52.8% in 2010

How it works (In Scotland):
(Scotland - 129 MSPs)
Step 1: Voters cast TWO votes - one for a PERSON in their CONSTITUENCY - one for a PARTY in their REGION
Step 2: 73 MSPs elected in 73 constituencies using FPTP from the constituency vote
Step 3: Remaining 56 MSPs elected REGIONALLY using the D'Hondt formula and lowest party list seats shared

Pros
MP Constituency link
Majority protection - 50% 49% vote, 50% seats
More choice - Green got 2 seats in 2007

Cons
Over representation of smaller parties - Green 2007
Complexity - not based on local constituencies or MP

Parties produce a list of candidates, most important at the top

How it works:
The country is divided into large multi member regions
Voters vote for a PARTY and their list candidates from the top of their list
If a party wins, say, 25% of the vote, they get to fill 25% of the seats with candidates from the top of their list
The list - the voter can express a preference for different candidates on the list. Therefore the list might be re-ordered before the seats are allocated

How it works:
Step 1: Northern Ireland is divided into 18 constituencies with 6 seats available in each
Step 2: Voters rank candidates in order of preference
Step 3: The drop quota is worked out - if one or more people have reached the drop quota, they get a seat. Any votes above the drop quota are redistributed by second preference to help other candidates get the drop quota too, until all seats are filled
Step 4: All first preferences are added together. In some, the number that is elected may be more than the number of seats available and the vote is redistributed according to second preference

Common 5 mark Q!

Party Systems

A PARTY system is **NOT** a choice - it is a result of the electoral system a country has chosen to use
It is defined as 'the number of parties with a realistic chance of FORMING GOVERNMENT' in a system

For example, in FPTP:

Two party system - Only Labour and Conservative have a real chance of FORMING government

Distinguish between forming government and winning a seat or two...these are different!

Could FPTP now be argued to be a 2 1/2 party system?
Could FPTP now be argued to be a multi party system?

Types of party system:

- One party system- Autocratic democracy
- Two party system - FPTP, SV
- Two and a half party? Coalition...
- Multi Party - STV, AMS, List

Major parties have faced challenge from 3rd parties - Labour came 3rd in 2009

Minor parties have had huge success -
2009 Con - 25, UKIP - 13, Lab - 13

Lib Dems get more proportional allocation of seats than in FPTP

Third parties eliminated - wasted vote for anyone else

Encourages two party system - Labour and Tories only winners (Ken and Boris!)

1998 - Good Friday Agreement
• creates Northern Ireland Assembly (108 members elected by STV)
• N.I. power-sharing executive - first and deputy first minister
1998-current - four suspensions:
11 February - 30 May 2000
10 August 2001 (24 hour suspension)
22 September 2001 (24 hour suspension)
14 October 2002 - 7 May 2007

'A place apart'

- N.I. in the Union depends on national support

- Usual UK parties rarely run, rather acting as neutral peacebrokers

- Security remains an issue:
